

2nd ROUGH-IN PLUMBING INSPECTION

Request to Exclude Shower Pan(s)-Site Built

Primary Contractor's Statement:

I request that the 2nd Rough-in Plumbing Inspection be approved and the permit placard signed off prior to the bathtub(s) and/or whirlpool bathtub(s) being installed and inspected. There are no other outstanding plumbing corrections to complete the 2nd Rough-in inspection. This exclusion will allow for framing inspection and approval. By my signature below, I agree to provide for the following inspections on the bathtub(s) and/or whirlpool bathtub(s) as a separate plumbing inspection at a later date:

- (1) I will not allow any portion of the Shower Pans, Drains, Control Valves and Piping to be concealed before Inspection.
- (2) I will provide any manufacturer's installation instructions and/or required listing information for installed material and equipment, if required, and not visible or available on site.
- (3) The Shower Pans, Drains, and/or Control Valves inspection will be requested before any wallboard or finish surfaces (tile, marble, etc.) are installed that will prevent the inspector clear access to inspect all portions of those areas listed in #1 above.
- (4) I understand that the hot and cold water supply piping, faucet(s) and shower piping requires a pressure test and the shower pans require a water test within 1" of threshold height.
- (5) I agree that any portion of the required areas of inspection stated in #1 that get concealed for any reason will be required to be uncovered at my expense.
- (6) I have read and agree to the provisions of this exclusion, and I have had any questions answered prior to my signing. This form must be signed by the Building, General Contractor, the homeowner when acting as the builder, or the Contractor's authorized representative.

Permit # _____

Date _____

Job Address _____

Signature _____

Printed Name _____
