HOW DO I PREPARE TO SURVIVE A DISASTER?

Getting ready for a hurricane or other disaster comes down to three basic steps:

1. Stay informed.
2. Know your risk.
3. Plan and Prepare.

Stay informed

Be sure to have at least two places where you can get alerts and dependable updates:

Alerts
- Alert Pinellas - Sign up to receive emergency notifications by phone, text or email. www.pinellascounty.org/alertpinellas
- NOAA Weather Alert Radio - Automatic alerts from the National Weather Service when dangerous weather is in your area.

Social media
- Get county news and updates from Pinellas County Government’s official Facebook and Twitter accounts.
  - Facebook for Pinellas County Government www.facebook.com/pinellasnews
  - Twitter for Pinellas County Government @PinellasCoNews
- Twitter for Pinellas County Emergency Management @PinellasEM
- Nextdoor - A private social network, where you can see news and updates from Pinellas County and other official agencies. www.nextdoor.com
- Be sure that the news you are getting from social media is from a trusted source.

Apps
- Ready Pinellas – A planning tool that you personalize to look up your evacuation zone, create your own emergency plan, get the supplies you need and use the checklist to get everything done before the storm. Download free on your mobile device (see back page).
- News media – Find news, weather and get alerts from the major news outlets.

Website
- Pinellas County website – Find tips on preparedness before the storm, updates throughout the storm and information after the storm. www.pinellascounty.org/emergency

Electronic newsletter
- E-Lert – Sign up to receive an electronic newsletter and learn more about preparedness. The e-Lert is emailed monthly during the Hurricane Season, June to November. www.pinellascounty.org/news_subscription.html

County television
- Pinellas County Connection Television (PCC-TV) - Info on county programs and services, general preparedness and live updates during emergencies from the Emergency Operations Center. Watch it on Spectrum 637, WOW! 18 or Frontier 44.
- YouTube for Pinellas County Government has videos on general hurricane information. www.youtube.com/pccctv1

Our contact information
- For more information, call Pinellas County Emergency Management at (727) 464-3800 or email ema@pinellascounty.org.
- During emergencies, the Citizen Information Center is open. Call (727) 464-4333.

Other county numbers
- Florida Department of Health in Pinellas County (727) 824-6900 www.pinellashealth.com

Know your risk

Storm Surge

Storm surge is the No. 1 killer of people in hurricanes. Evacuations are based on the amount of storm surge that is predicted for the approaching hurricane. Storm surge is water that is pushed from the Gulf of Mexico onto the land by the force of the wind. It happens quickly and is powerful, rushing over land and overtaking everything in its path.

There are five zones for evacuation based on where the surge may impact. “Zone A” areas are most prone to storm surge. Those in Zone A are evacuated first. This includes the beaches and low-lying areas in the county. If the storm is large enough we may call for evacuations of Zones B, C, D and up through Zone E. You should evacuate outside of the evacuation areas. Each storm is different so it is critical that you stay informed.

Because evacuations take time to ensure everyone can get to safety, they are called well in advance of the storm. Evacuations have a beginning and end time. You must be in your safe shelter by the end of the evacuation period to make sure you are safe before the storm surge and high winds arrive.

Evacuation orders issued by Pinellas County are for the entire county, including cities and unincorporated areas. Listen closely to the evacuation order to see if your zone is included. If it is not included, you do not need to evacuate based on storm surge.

Know your zone

There are several ways to find out your evacuation zone:

- www.pinellascounty.org/knowyourzone
- Ready Pinellas mobile app
- Utility bill (Pinellas County Utilities customers, some cities)
- Property Appraiser records
- (727) 453-3150 (landlines only)

If you live in or have a businesses in a “non-evacuation zone,” you will not be ordered to evacuate (with the exception of mobile and manufactured homes).

Now you need to consider the other two potential risks: flood and wind.

What’s the difference between evacuation zones & flood zones?

<table>

</tr>
</tbody>
</table>

My evacuation zone is

Residents in mobile homes, recreational vehicles and manufactured homes must always evacuate no matter where in the county they are located.
Insurance

Not all insurance policies are created equal. Check your policy or talk to your agent to make sure you’ve got sufficient coverage and to determine if any home improvements would qualify for a discount on premiums.

- Homeowner Insurance policies DO NOT cover damage from rising flood waters or storm surge. If you own a home in a high risk flood zone, your mortgage company will likely require you to carry a separate flood policy.
- Anywhere it rains it can flood. About 25 percent of flood insurance claims occur outside of high risk flood zones. If your home is in a low or moderate risk area take advantage of a highly discounted Preferred Risk Flood Insurance Policy.
- A new policy takes 30 days to take effect, so don’t delay. Purchase flood insurance for your home, business or rental. Assistance is available from Pinellas County Flood Insurance Advocates at www.pinellascounty.org/flooding/advocates.htm.
- Understand your coverage. Your structure and your contents are covered separately on your flood policy. For details visit www.iii.org/article/making-sure-your-home-properly-covered-disaster.

Home hardening

Adding storm shutters, garage door braces and hurricane straps to the roof will make your home safer from wind damage and could lower your insurance costs.

Questions to ask yourself

- Do I know my evacuation zone?
- Do I know my flood zone?
- What are my deductibles?
- Should I get flood insurance?
- Do I have enough coverage to replace my home and belongings?
- Do I have loss-of-use coverage for temporary housing expenses?

Insurance claims

Before the event:

- Take photos or video and inventory your property. You will need this, if you have to make a claim.
- Make sure you have all of your important documents together.
- Back your photos and documents up electronically using cloud-based storage.

After the event:

- Take photos or video of the damage to document your losses for your insurance claims before you move any debris or remove damaged belongings.
- Make a list of damaged contents.
- File your insurance claims promptly. There are time limitations on submitting claims with many insurance companies.
- Do not sign an Assignment of Benefits. In Florida, there’s a rapidly growing scam in which some unscrupulous home repair vendors pressure homeowners to sign away the rights and benefits of their insurance policies as a condition of performing work. This practice has led to grossly inflated claims and an explosion of Assignment of Benefit lawsuits against insurers, which is driving up the cost of homeowners’ coverage for consumers.

Hurricane windstorm insurance

Check that your insurance policy covers damages from wind. Not all policies include this. Different carriers have different waiting periods so do not wait until a storm is approaching to purchase this.

Other insurance

Consider insurance for mobile homes, cars, boats and businesses to protect against storm damage and flooding. If you rent your home, be sure that you have insurance to cover the replacement of your personal property. Encourage your renters to have insurance policies for their belongings.

Home evacuation zones and flood zones are not the same thing. You can live in an area that is in a non-evacuation zone based on storm surge, but everyone is in a flood zone, which may be high, moderate or low flood risk.

It is important to check both your evacuation zone and your flood zone. Look up both at www.pinellascounty.org/flooding/maps.htm.

Hurricanes, tropical storms and other severe weather can cause high tides, flooding and other drainage problems in Pinellas County. Just a few inches of rain over a short period of time can present flood hazards. Also, multiple days of rain can have a lasting impact. Low-lying areas can be especially vulnerable during these events.

Hurricane wind speed is described in categories from 1 to 5. The scale to the right gives an idea of how much property damage could occur.

In assessing your risk for wind, consider the age and sturdiness of your structure. If you live in a mobile home, manufactured home or recreational vehicle, you must evacuate no matter what, because these structures are not strong enough to withstand high winds, even if they are strapped down. If you live in a house and are not being ordered to evacuate because of storm surge, you must decide if you will be safe from the wind if you stay in your home. If your structure is not sound, consider riding out the storm at a host home, hotel, or as a last resort, a public shelter. Adding storm shutters, garage door braces and hurricane straps to the roof will make your home safer from wind damage and could lower your insurance costs as well.

If you have a business, church building or other structure, be sure that it is a sound structure before inviting others to shelter there.

In 2017, Hurricane Irma only had wind gusts to category 1 strength in Pinellas County, yet power was out for several days for many residents. Do not underestimate a hurricane or even a tropical storm.

High-rise buildings

If you are in an evacuation zone and are ordered to leave, don’t make the mistake of thinking that condominiums and other high-rise buildings are safe. They are not, for several reasons:

- Storm surge may compromise the foundation of the building.
- Wind can cause windows to blow out, floors to collapse, roofs to rip off.
- Even if you have shutters, other occupants of the building may not. Unprotected windows can fail, allowing water into interior walls.

Saffir-Simpson Scale

</tr>
<tr>
<td>4 (major)</td>
<td>130-156 mph</td>
<td>Catastrophic damage will occur: Well-built framed homes can sustain severe damage, including roof structure &amp; some exterior walls. Most trees snapped. Power outages for weeks or months. Most of the area uninhabitable for weeks or months.</td>
<td>mph</td>
</tr>
<tr>
<td>5 (major)</td>
<td>157 mph or higher</td>
<td>Catastrophic damage will occur: High percentage of framed homes destroyed, total roof failure &amp; wall collapse. Fallen trees and power poles will isolate residential areas. Power outages will last for weeks or months. Most of the area uninhabitable for weeks or months.</td>
<td>mph</td>
</tr>
</tbody>
</table>

Wind

In 2017, Hurricane Irma only had wind gusts to category 1 strength in Pinellas County, yet power was out for several days for many residents. Do not underestimate a hurricane or even a tropical storm.
When an evacuation is called, what will you do?

Mobile homes must always evacuate

Mobile homes, manufactured homes and recreational vehicles are not strong enough to withstand the strong winds of a hurricane. Whenever an evacuation order is given in Pinellas County, residents of mobile homes, manufactured homes and recreational vehicles must evacuate. This evacuation order is for the entire county, regardless of where you are located in the county.

- Even newer mobile homes, built under tougher laws, can’t withstand the force of hurricane-force wind gusts or tornadoes. In addition, carports, awnings and parts of the home may become missiles in the wind, making the mobile home parks themselves dangerous places to be.
- The community centers in the mobile home parks are not safe shelters.

To protect your mobile home:
- Add anchors and straps if needed.
- Replace rusted anchors and connections.
- Tighten straps.
- Fix wood rot and termite damage at connections, joists and trusses.

Before you evacuate:
- Put shutters/plywood over windows.
- Remove loose items from around your unit.
- Lower TV and radio antennas.
- Lower/remove awnings.
- Elevate belongings if your park often floods.

Should I stay or should I go?

Use this tool to see if and when you would have to evacuate.

**If you do not live in a mobile home, do you live in an evacuation zone?**

**Are you in the zone ordered to evacuate?**

My zone/level is _______.

I DON’T KNOW

Start Here

Do you live in a mobile home park?

YES

Go

NO

Stay

You will not be ordered to evacuate in any hurricane. Consider being a host home to friends and family.

Stay

If you do not live in a mobile home, do you live in an evacuation zone?

YES

You must ALWAYS evacuate when your zone is ordered to evacuate. Always evacuate outside the area ordered to evacuate.

You are considered to be Zone/Level A and must ALWAYS evacuate when Level A or higher is ordered.

NO

Stay

Businesses and residences in zones A and B should evacuate as soon as conditions start getting worse.

Assistance with transportation

If you have to evacuate, be ready to leave your home early because these services will stop as soon as conditions start getting worse.
- If you are in need of transportation to a shelter, PSTA buses run free to public shelters during evacuations as long as it is safe. They may modify regular routes. Pets are allowed. Buses will stop running just before the winds increase to give staff time to reach safety.
- If you have special medical needs, prepare ahead and register for transportation assistance. Call Emergency Management at (727) 484-3800.
- If you plan to use taxis or other commercial transportation services, do so early. These drivers may have to evacuate as well and may stop providing transportation.

Look up your evacuation zone:
- (727) 453-3150 (automated—for land lines only)
- www.pinellascounty.org/knowyourzone
- Storm Surge Protector on www.pinellascounty.org/emergency and on the Ready Pinellas mobile app
- Utility bill
- Property Appraiser records

Once you find your zone, write it down and follow the guidelines.

www.pinellascounty.org/emergency
What public shelters might be open?

Not all shelters open for all evacuations.

Check the website www.pinellascounty.org before heading to a public shelter to make sure it is open. Updates on open shelters will also be provided to local media.

Special Needs Shelters

Pinellas County has three special needs shelters. As denoted Residents who go to special needs shelters are usually those who:

- Have minimal medical needs
- Who are dependent on electricity
- Have no other options

Register at www.pinellascounty.org/specialneeds or call Pinellas County Emergency Management at (727) 464-3800

Note: Special needs shelters are NOT for those who live in assisted-living or long-term nursing care. If you are a resident, ask the facility’s management about their emergency plans.

If someone cares for you at home, talk to them about your evacuation options. Caregivers are encouraged to stay with you at the shelter.

Keep in mind that the public shelters are not made for comfort. They truly are a life boat not a cruise ship. There are not enough cots, there may not be much space, the air conditioning could go out, and it will be noisy. If you have no other option, please come and be safe but be prepared.

Be sure to share all of your plans with family and friends so that they know where you are and know you are safe. Designate one person that you can contact to let them know you are OK.

Transportation assistance

As part of the special needs program, transportation assistance is provided by your local fire department. The fire department will transport residents to a special needs shelter or general public shelter if they cannot make their own arrangements.

If you need this assistance, you MUST register for transportation assistance.

- Simply check the box on the special needs registration form to indicate this need.
- You can also contact your local fire department directly.

If an evacuation is ordered for your area, your fire department will contact you to let you know they will be picking you up at your home. If you have made other plans, there is no obligation to go to the shelter.
Special Needs Continued: Your pets

Pets cannot stay in the special needs shelter with you. If you do not have a family member or friend who can care for your pet while you are at the special needs shelter, Pinellas County Animal Services will care for them. Pets must be registered for this special needs service. Call Animal Services at (727) 582-2600.

- All you have to do is go to the special needs shelter with your pet.
- A staff member or volunteer will meet you there and bring your pet to the dog and cat shelter on Ulmerton Road in Largo.
- Once you return home, they will bring your pet home to you.
- You need to provide a leash, carrier, license, health records, medication and any special instructions. Food is supplied, but you can send your own.
- Please note that this is for cats and dogs only. If you have a pet other than a dog or cat, make plans now for someone to care for them while you are staying in the shelter.

Service animals are welcome at any shelter.

How kids can help

Make plans with the whole family

- Involve children in emergency planning.
- Let them help build the Emergency Preparedness Kit. Use matter-of-fact language to discuss safety steps you will take.
- Play “let’s pretend” games with young children to help them work out “what if” situations.

What you might need

- Diapers and wipes
- Powdered milk
- Blanket and pacifier
- Stuffed animal or favorite toy
- Favorite non-perishable snacks
- Toys
- Games
- Plenty of batteries

If you are evacuating or even if you’re riding out the storm at home, don’t forget the everyday items your children will need. Think through a typical day at home and plan as if there will be no power. A few suggestions:

Some good sites for kids

- Becoming Storm Smart • Pinellas County Emergency Management https://youtu.be/qtNhzrm-fEo
- Pinellas County Hurricanes for Kids Activity Book www.pinellascounty.org/kids
- Kids Get a Plan • Florida Division of Emergency Management www.kidsgetaplan.com
- Owlie Skywarn • National Weather Service www.weather.gov/owlie
- Ready for Kids • National Hurricane Center www.ready.gov/kids
- Weather Wiz Kids www.weatherwizkids.com/weather-hurricane.htm

Evacuating

If you live or have a business on the beaches, remember to obtain an Emergency Access Permit from the Sheriff’s Office or your municipality for easy re-entry after the storm.

Staying local

The best option for evacuation is staying with family or friends who are not in an evacuation zone. But not everyone in this area has family or friends to stay with.

To solve this, you can organize a host home program as part of your faith-based community, civic group or organization. There is a “toolkit” available on the Pinellas County website that you can use to match up people who have to evacuate with people who do not. To learn more, visit www.pinellascounty.org/emergency/hosthomes.htm.

Pet host home

If you can’t host anyone but have room and a heart for pets, consider making the offer to shelter the pets of family or friends. This would give the pet owner more options for their own evacuation plans while keeping the pet safe.

Leaving town

If you decide that you will evacuate from the county, you must leave days in front of the hurricane to beat overbooked flights and jam-packed highways.

- If you are driving to your safe place, be sure to fill your gas tank as early as possible, get cash and bring your emergency kit. Have emergency supplies on hand for your vehicle as well.
- Plan on traveling to an area that is not anywhere close to the hurricane’s path. There are many examples of people evacuating to the other side of the state, or to a state north of Florida, where the hurricane ends up hitting the hardest. The path of a hurricane can change, often at the last minute, and a single storm can be hundreds of miles wide.
- After the hurricane passes, you may not be able to get back into the county right away. Flights may be canceled, highways closed and bridges damaged. Traffic may be restricted until it is safe.
- If you know you have to be available right after the storm, you may want to consider other options.

Hotel

If you are planning to stay in the county or travel outside of it to stay in a hotel or other lodging, choose wisely and remember to leave early enough so that you can travel safely.

- Check the evacuation level of the hotel you plan to use.
- Be sure to make reservations early and call ahead to confirm.
- Look for pet-friendly lodging for your pets.
- Visit St. Pete/Clearwater participates in a statewide Accommodations Availability & Information Hotline. Call (800) 317-5050 or visit www.visitspeteclearwater.com/storm, active before and after the storm.
- Do not depend on the hotel and neighboring businesses to have food. Bring enough non-perishables and water for at least two weeks.

Shelters:

Even though shelter space is limited in Pinellas County, you will not be turned away. If you have questions during evacuations, the Citizen Information Center is open during emergencies at (727) 464-4333.
Planning for your pet

Your pets are a part of your family and it is important that you plan ahead for their needs as well.

- Update your pet’s vaccinations and make sure their collar/leash/muzzle is up-to-date.
- Microchip your animal in case you get separated. If your contact information changes, update it with the service that you registered with.
- Take a photo of you and your pet. Keep it with your important documents and on your phone.
  - Obtain a crate for your pet, one that is large enough for them to turn around in. Do not wait to purchase one. They may not be available later in the season.
  - If your pet takes medications, keep a two-week supply on hand. Pets may get anxious during stressful events, ask your veterinarian for advice.

Build your pet’s emergency kit

- Enough pet food and water for two weeks
- Identification/microchip (remember to update)
- Pinellas County Animal Services license
- Immunization records
- Photo
- Collar/leash/muzzle
- Medications for two weeks (with instructions)
- Toys/blanket
- Cat litter, pan, scoop
- Plastic waste bags
- Disinfectant
- Paper towels
- Carrier or crate
- Newspaper or other lining

If you will evacuate

- Never leave any animal alone at home if you evacuate.
- If you plan to evacuate out of town or to a public shelter, consider asking friends or family who live in an area that is not being evacuated to care for your pets. It will make it easier for you and less stressful for your pets.
- If you will be bringing your pet to a host home, hotel or shelter, make sure type of pets(s) and number of them will be accepted.
- Many hotels allow pets during evacuations. Check hotel availability at www.visitstpeteclearwater.com, where Visit St. Pete/Clearwater has a statewide directory that is updated during emergencies.
- If you make arrangements with a kennel or veterinarian, check with them ahead of the storm to make sure they still plan to remain open.

Pet-friendly shelters

If you have no other option, the county has three pet-friendly shelters that may open. These shelters are for dogs and cats only.
- Palm Harbor University High School, 1900 Omaha St., Palm Harbor
- Largo High School, 410 Missouri Ave. N., Largo
- Gibbs High School, 850 34th St. S., St. Petersburg

At the pet-friendly shelters, your pet will be in a crate in a separate area of the shelter from you. The owners must stay at the shelter and are expected to care for them. You will need to provide the crate and have a leash and collar, food and water bowls, litter box and litter, medicines, and any comfort items. Food is available for the pets at the shelter but you may want to bring your own. Pre-registration is not required. A pet identification form is available on the Pinellas County Animal Services website at www.pinellascounty.org/animalservices. Fill it in and tape it to your pet’s crate. It will make registration easier once you get to the shelter.

Service animals are always allowed. They need an emergency kit too, with enough food and supplies for two weeks. PSTA provides free bus service to pet-friendly shelters.

Where you cannot bring your pets

Animal shelters cannot shelter pets during a disaster.

- Do not bring your pets to Pinellas County Animal Services, SPCA Tampa Bay, Humane Society of Pinellas or other animal welfare organizations. Check with your veterinarian or boarding facilities and make plans early. Before making final preparations as a storm nears, confirm that the facilities are going to remain open.

Other pets

- If you have pets other than cats and dogs, you have the responsibility to plan for their safety.
- All animals need at least two weeks of food, water and other supplies. After a hurricane, it will be difficult to get supplies for more exotic animals, so be prepared for at least a month.
- When you evacuate with your pets, be sure to keep them secure.
- Never let your animal loose. It is not safe for them or others.

Horses

- Make sure vaccinations are up to date.
- Form a neighborhood disaster committee so your neighborhood can work together and share resources.
- Have sufficient animal identification.
- Clean up your property, remove debris as part of your preparations.
- If you plan to evacuate, leave early.
- If you are staying home, have at least a two week supply of hay and water.

The Sunshine State Horse Council provides information on preparing your horse and what to expect before, during and after a storm. Find information on making an emergency plan for your horses at https://evac.flahorse.com

Lost pets

If you lose your pet during the storm, do not look for him/her until the storm passes and it is safe to go outside.

Once the hurricane passes, responders will pick up stray animals and bring them to temporary collection sites to keep them safe. Once they are brought to a more permanent site, instructions will be announced to the public.

How do I secure my boat?

No matter how seaworthy your boat is, never stay on your boat in a hurricane. Make preparations early and evacuate for your safety. Note that drawbridge operations will be modified during evacuations.

Modified bridge closings

When a hurricane is approaching, Pinellas County’s 10 drawbridges will not open for boats on demand, giving preference to evacuating vehicle traffic. As it gets closer, the bridges will be locked down to ensure that the barrier islands are evacuated and to protect the bridges from wind damage.

A special marine advisory will be issued by the U.S. Coast Guard to update boaters on channel 16.

The 10 drawbridges are:
- Pinellas Bayway
- Indian Rocks
- Tierra Verde
- Dunedin Causeway
- Corey Causeway
- Beckett Bridge
- John’s Pass
- Park Boulevard
- Tom Stuart Causeway
- Treasure Island

Preparing your boat

Marina slip or private dock storage

- Keep insurance up-to-date.
- Create a hurricane plan for your boat and file a copy with the marina operator.
- Take a photographic inventory of your boat and its contents.
- Purchase and snow mooring line for storms—line should be about twice the diameter of normal line. Allow extra line for tide and storm surge.
- When a storm is approaching, remove loose items on the deck and store them on land.
- Shut off fuel lines at the tank.
- Keep batteries charged; make sure bilge pumps are operating properly.
- Secure hatches and doors.
- Use several cleats to distribute the load on the boat.
- Use chafing gear, such as reinforced radiator hose where lines will rub for protection – several feet on each side.
- Disconnect electric, water, fuel and other dock connections.
- Remove valuables.

Land storage

- Store boat and trailer in a secure covered building, such as a garage if possible.
- If left outside, secure using ground hooks and straps.
- Put wooden blocks between trailer frame and springs for extra support with added weight.

Anchored storage

- Anchor on the lee side of protective land rather than mooring to a dock.
- Use two anchors and no stern anchor.
- Line length should be six to nine times water depth for storm surge shift.
- Keep batteries charged and bilge pumps operating properly.
How can I prepare my home?

There are several simple steps to making your home storm ready, and they do not have to be expensive fixes.

*Brace Your Gabled Roof
Gabled roofs—two slopes that come together to a peak at the top—are prone to failure if not properly braced in construction. High winds could cause your end wall to collapse. See the Florida Division of Emergency Management’s Hurricane Retrofit Guide for advice: www.floridadisaster.org/hrp.

*Protect Your Windows
Your best option is to install impact resistant windows or hurricane shutters. Otherwise, be ready to cover your windows with commercial exterior plywood—7/16” minimum—when a storm is approaching.

Prepare Your Yard
Rock mulch, sagging tree limbs and yard furniture are among the objects that could become deadly missiles in high winds. Keep your trees pruned, clean out your gutters on a regular basis, and when a storm is coming:...

- Dispose of any piles of loose tree limbs or debris. Check with the county or your city for specific guidance in your area.
- Bring in all large yard items, such as furniture, grills and bird baths.
- Do not drain your pool. Super chlorinate the water and turn off the electricity. Note: Putting outdoor furniture in the pool to keep it out of the wind could harm the furniture and damage the pool finish.

What about rental properties?

Renters and property managers should make sure that they both have hurricane plans in place and that they understand what each is responsible for to prepare for a hurricane and when renters should return.

- What evacuation zone are you in?
- If you are in an evacuation zone, where will each of you go? Get emergency contact information.
- Who will shutter the windows and make other preparations?
- If the rental property is damaged, what should the renter do? What will the property manager do?
- Will you be permitted to return? If my rental is damaged what are my options?
- If you can, put the agreement in writing. If you are going to rent, you can include it in the lease.

For renters

- Consider getting insurance to protect your personal belongings. The landlord’s insurance does not protect anything that you own.
- Always share emergency contact information, in writing.
- Know if you may need to evacuate and let your landlord know where you will be.
- Find out where your landlord will be staying.
- Prepare Your Vehicle
- Keep up with your car’s maintenance.
- Keep gas tank half full—fill tank during a Hurricane Watch.
- Build a survival kit for your car: first aid, non-perishable food/water, tire inflator, tool kit, jack and spare tire, jumper cable, road flares, flashlight, DC/AC power inverter, mobile device chargers, map with shelter locations.

*Brace Your Garage Door
Old garage doors in good condition can be braced with retrofit kits while new doors must meet stringent wind requirements. After Hurricane Andrew, engineers determined four out of five homes that suffered major structural damage lost their garage door first.

Prepare Your Yard

- Replace any worn out weather stripping or caulk around windows and doors.

Check Seals

- Make sure you have adequate insurance.
- Take steps to make your rental property storm ready.
- As the storm approaches, secure your rental: shutter windows, make sure your tenants are safe and have the supplies they need if they will shelter there.
- Make sure that your tenants know their responsibilities.
- Take care of your responsibilities.
- Check on your tenants before and after the storm.

*Protecting windows, gable roofs and garage doors are the most important steps to take.

Should I get a generator?

A fuel-powered generator can keep your appliances going after a disaster and would keep you more comfortable. You can buy a small one to run your medical equipment. But keep in mind, generators come with the dangers of carbon monoxide, electrical shock and fire.

Follow these safety measures:

- Use generators outdoors and away from windows and doors to avoid carbon monoxide exposure. NEVER operate a generator indoors. NEVER use a generator in an attached garage, even with the garage door open.
- Plug appliances directly into the generator or use a heavy-duty, three-pronged extension cord.
- NEVER plug the generator into a wall outlet—this can cause electrocution.
- Buy a carbon monoxide detector.
Build an Emergency Preparedness Kit

Basic Supplies
- Water—at least one gallon of water per person per day for drinking, and one gallon per person per day for hygiene and cooking
- One-week supply of fluids to drink and non-perishable food that does not require cooking, for example: dried fruit, canned tuna fish, peanut butter, etc. (Remember comfort foods.)
- Non-electric can opener
- Medications and copies of prescriptions (Ask your pharmacist for a printout).
- Rain gear
- Flashlight or lantern
- Battery-operated or hand-crank radio
- Extra batteries
- First aid supplies—over-the-counter pain reliever, anti-diarrhea medicine/faxitice, anti-histamine, anti-itch creams, antiseptic
- Sanitation—wipes, antibacterial hand gel, soap, toilet paper, hygiene supplies, feminine supplies, diapers
- Insect repellent
- Extra batteries for medical devices such as hearing aids, etc.
- Eyeglasses and extra contact lenses
- Extra bottled oxygen if dependent on it
- Small generator for electrically dependent equipment like an oxygen concentrator or nebulizer
- Cash for when ATMs are out of service—small bills will make purchasing easier
- Emergency Access Permit (for beaches)
- Books, cards, board games for entertainment
- Full tank of gas in vehicle
- Cell phone with charger, extra battery backup, solar charger
- Contacts in mobile device and in print for backup
- Information downloaded to your mobile device (contacts, maps)
- A paper map
- Paper and pencil
- Sunscreen

Stay Kit for Home
Even if you are evacuating, these supplies will be needed when you return:
- Two weeks of fluids to drink and non-perishable food that does not require cooking, for example: dried fruit, canned tuna fish, peanut butter, etc. Remember comfort foods
- Paper plates, plastic cups and utensils
- Cooler with ice (Make extra ice in plastic bags and plastic food storage containers and keep it in the freezer to keep food cold longer)
- Insect repellent
- Sunscreen
- Tarps
- Rope or elastic cord (for tarps if necessary)
- Whistle to signal for help
- Tools, including wrench to shut off water, utility knife for sheeting and duct tape, hammer and nails to make temporary repairs

Important Documents
- Take photos of your documents for backup. Put paper copies together in a sealed plastic bag.
- Driver license or ID card
- Emergency Access Permit for barrier island residents/businesses
- Social Security card
- Important numbers and emergency contacts
- Medical records – pharmacy prescription record, doctors, medications, dosages, blood type
- Insurance policies for home, health, flood, auto, renters

If You Go
Host Home or Hotel Go Kit
In addition to basic supplies:
- Pillow and blankets
- Air mattress, sleeping bag, floor mat or other as needed
- Food and water. Find out from the host what you can bring, including the perishable food you have left.
- Paper plates, plastic cups and utensils
- Complete change of clothing for several days
- Special dietary items (sugar-free, low sodium, gluten-free, etc.) with can opener if required. (Common food and water is supplied)
- Personal hygiene (toothbrush, wipes, soap, hairbrush, adult diapers)
- Earplugs, headphones, sleep mask

Public Shelter Go Kit – General
In addition to basic supplies:
- Wearable medical alert tag
- Blanket, pillow, cot, folding chair or twin-size air mattress
- Complete change of clothing for several days
- Special dietary items (sugar-free, low sodium, gluten-free, etc.) with can opener if required. (Common food and water is supplied)
- Personal hygiene (toothbrush, wipes, soap, hairbrush, adult diapers)
- Earplugs, headphones, sleep mask

Special Needs Shelter Go Kit
In addition to basic supplies:
- Any durable medical equipment or supplies you may need such as:
  - Wheelchair, walker or cane
  - Eyeglasses
  - Hearing aids with batteries
  - Oxygen concentrator
  - Nebulizer
- Medications in the original container (2-week supply).
- Blanket, pillow, cot, folding chair or air mattress (available cots are limited in number)
- Complete change of clothing for several days
- Personal hygiene (toothbrush, wipes, soap, hairbrush, adult diapers)
- Talking or Braile clock
- Pen and paper for communicating emergency information
- Earplugs, headphones, sleep mask
- Written instructions or orders regarding your care
- Pet Go Kit (Pets do not stay with you—see page 7)

Basic Supplies for Pets
- Enough pet food and water for two weeks
- Identification/chip (remember to update)
- License
- Immunization records
- Photo
- Collar and leash
- Medications for two weeks with instructions

If You Stay or When You Return
- Dust mask, to help filter contaminated air
- Sheets of plastic and duct tape to seal windows and doors if ordered to do so
- Matches or lighter in waterproof container
- Large garbage bags
- Portable toilet—use one from a boat or camper, or make one using a 5-gallon bucket with lid, trash bags, chlorine bleach
- Household chlorine bleach with medicine dropper to disinfect or treat water. (Do not use scented, color safe or bleach with added cleaners.)
- Extra gas if you have a generator and somewhere safe to store it
- Extra propane or charcoal for outside grill
- Battery-powered fan
- Camera to take photos/video of damage

Important Documents
- Titles to house, cars
- Pay stubs for disaster assistance eligibility
- Household inventory for insurance claims – photo or video documentation stored online
- Other irreplaceable papers, such as birth, marriage, divorce, death and adoption certificates; passports; military records; wills; trust documents
- Account numbers for bank, credit cards, savings and investments.
- This Hurricane Preparedness Guide for reference, which you can also download from www.pinellascounty.org/emergency.
Good business preparedness

A hurricane or other major disaster could shut down your business for weeks or months. According to FEMA, almost 40 percent of small businesses never reopen their doors after a disaster. Many times this is due in part to a lack of planning. It is critical to have a business continuity plan so that you can resume offering your services to the community as soon as possible.

Sign up for emergency notifications
- Make sure members of your workplace sign up for Alert Pinellas at www.pinellascounty.org/alertpinellas. This is a free community notification service that allows you to get alerts via cellphone, email and/or texts. Important information will be relayed during an emergency.
- Sign up for emergency notifications and other news from Pinellas County Economic Development at www.pced.org/subscribe.
- Register for updates from the Florida Division of Emergency Management at www.floridadisaster.biz.

Get help with business disaster planning
Pinellas County Economic Development can help prepare your comprehensive business continuity, emergency preparedness and disaster recovery plan at no cost. Schedule an appointment with the Florida Small Business Development Center at Pinellas County Economic Development at www.pced.org/sbdc or phone (727) 453-7200.

What is your risk?
Check the evacuation zone for your business, look up the flood zone and access the sturdiness of your building in the case of high wind.

Steps to prepare your business
- Plan on doing business without power.
- What are your critical business functions? Plan for more than one employee.
- Store your important documents and data in cloud-based storage, and back it up on a hard drive. Remember to share access information with more than one employee.
- Practice restoring your technology. Share the procedure, along with passwords and log-ins, with more than one employee.
- If employees will work from home (if there is power), practice the plan. Make sure they have proper access to work remotely and that they are able to use the technology provided.
- Create an employee, vendor and key client communication plan; share this plan and test it with your employees. Update it frequently. Print it out.
- Communicate your disaster plan to employees; specifically, when you will shut down operations and send them home, as well as your plans for reopening and your expectations of them.
- If you have a sturdy building in a non-evacuation zone, consider offering your employees a host home/building so that they have a safe shelter. If you do, be sure to communicate the guidelines and responsibilities beforehand. Will you allow family members and their pets to shelter? Who will bring food? Where will everyone sleep?
- Protect your greatest assets by helping to prepare your employees. Share educational materials about personal emergency planning, host a guest speaker from Pinellas County Emergency Management or Economic Development. Be receptive to the concerns of your employees.
- Review your business insurance coverage. Does it include business interruption coverage? This is insurance to compensate you for lost income if your company is unable to operate because of disaster-related damage.
- Identify who is responsible for assessing your business after the storm. Ensure they have a letter or ID so they can pass through traffic control points if appropriate.

Prepare an emergency kit
Remember to print out key information.
- Insurance policies
- Contracts, plans
- Property management contracts
- List of vendors
- Employee contact information and emergency plans
- Photo inventory of the interior and exterior of the business
- Backup files/drivers for data
- Logins and passwords

When it’s time to go
Evacuations are called according to evacuation zones. They apply to all types of properties. When an evacuation is ordered, businesses in the evacuation zone must leave as well.
- Before you go, clear your property of debris and loose items. Take down signs that could be damaged in high winds.
- Prepare the building by covering windows and securing doors.
- When considering the timing of evacuations, consider the responsibilities of your employees. Closing early and allowing employees to leave gives them the time they need to prepare at home.
- Before you go, shut off the electricity, water and gas.

Tourism businesses
- Visit St. Pete/Clearwater’s Accommodations Hurricane Preparedness Tool Kit includes useful resources to help those in the tourism industry be better prepared in the event of a weather related emergency.

Report damage or economic injury
The Florida Business Damage Assessment Survey is a required first step in applying for a Florida Small Business Emergency Bridge Loan and an important way that the state assigns resources to help businesses and communities recover after a disaster. All businesses in Pinellas that have sustained damage or economic injury due to a disaster are asked to visit https://floridadisaster.biz/BusinessDamagesAssessments or www.pced.org/AssessmentSurvey to and after a named storm.

Disaster loan assistance to get back to business
SBA disaster loans
Once a disaster has been declared, the U.S. Small Business Administration provides low-interest disaster loans to businesses of all sizes, private non-profit organizations and even homeowners and renters. SBA disaster loans can be used to repair or replace real estate, personal property, machinery and equipment, inventory and business assets. For more information, visit www.disasterloan.sba.gov.

Florida small business emergency bridge loans
Should disaster strike, Pinellas County Economic Development will help businesses apply for Florida’s emergency bridge loan program. This program provides a source of expedient cash flow to businesses impacted by a catastrophe so that they can begin repairs and replace inventory. For more information, visit www.pinellascvb.com/storm.
**The storm is coming. What does “in the cone” mean?**

The National Hurricane Center uses a graphic of a cone to show the probable track of a storm on weather forecasts. You can use it as a guide for the type of preparations you should make. The closer the hurricane is, the more accurate the forecast. But be aware that hurricanes often shift direction at the last minute, so you need to be prepared if you are anywhere near the cone.

As you make your preparations, remain calm. After all, you have learned about hurricanes and hazards, you know your risks and what you plan to do, and have made the preparations to do it.

---

**5-day cone**

If Pinellas is in the 5-day cone it means a storm is on a probable path to reach our area in five days.

**Implement your plan.**

- Know your zone. If you do not already know your zone, look it up. ([www.pinellascounty.org/knowyourzone](http://www.pinellascounty.org/knowyourzone))
- Review your family disaster plan.
- Get your emergency preparedness kit with important papers ready.
- Begin to prepare your home and yard.
- If you have special needs, have your caregiver begin to implement your plan. If needed, be sure you are registered for a special needs shelter.
- You do not need to wait for an evacuation order if you do not wish to. Just remember, if you plan to evacuate to somewhere else in Florida there is no guarantee that area will not be hit by the storm if its path changes.

**3-day cone**

If Pinellas is in the 3-day cone it means a storm is on a probable path to reach our area in three days.

**Step up your preparations.**

- Double check your survival kit and make any last necessary purchases.
- Gather special supplies for infants, children, seniors and pets.
- Be sure you have all materials and tools necessary to shutter windows.
- If your plans are to evacuate, make arrangements, book reservations and pack what you can in your vehicle.
- Refill medications. (If the Governor has declared a state of emergency that includes Pinellas you can get a 30-day refill without the insurance company’s usual restrictions.)
- You do not need to wait for an evacuation order if you do not wish to. Just remember, if you plan to evacuate to somewhere else in Florida there is no way to tell this many days ahead exactly where the storm will hit.

---

**Hurricane watch**

(48 hours ahead)

- Prepare as if the storm is headed directly for your home. Be ready for a Hurricane Warning within a few hours if the storm remains on track and continue implementing your disaster plan.
- Fill vehicle gas tank.
- Get cash, secure papers and valuables.
- If you could not refill your medications in the 3-day cone timeframe try again now.
- Fill containers and tubs with water, even if evacuating—you may need the water when you return.
- Secure yard equipment and furniture.
- Shutter your windows.
- If your plans are to evacuate the area if you are ordered to, secure your home so you can leave as soon as an evacuation order is issued.
- If you are registered for a special needs shelter and will be getting transportation, be sure you have everything you need for your emergency preparedness kit.
- You do not need to wait for an evacuation order. Just remember, if you plan to evacuate to somewhere else in Florida, there is no guarantee that area will not be hit by the storm if its path changes.
- Be prepared for an evacuation order to be issued at anytime.

**Evacuation order**

Listen carefully to the evacuation order. What zone is being told to evacuate?

**Are you in that zone?**

**NO** I do NOT live in an evacuation zone that is included in the evacuation order.

If you do not live in the evacuation zone that is being told to evacuate, you do not have to leave your home. Review your plan and your decision on whether you will stay or go. (See page 5)

**YES** I live in an evacuation zone that is being ordered to evacuate.

**YES** I live in a mobile home.

If you answered YES you must evacuate.

**Steps before you leave**

- Turn off the water and gas utilities.
- Lock windows.
- Close all doors.
- Tell friends and neighbors where you are going. If you are evacuating locally, get to your shelter location within a few hours of the order.
- If you are going to a host home, go there now.
- Be aware of your evacuation time range. Evacuations will be issued with beginning and end times. The end time means that sustained tropical storm force winds are expected to arrive by that time and all evacuations should be complete.
- Stay safe during the storm.
# The storm is here. What should I expect?

Hurricane Irma gave us a small taste of what life could be like in the case of a major hurricane. Power outages and heat were two of the biggest challenges. Expect these conditions to last days and even weeks.

<table>
<thead>
<tr>
<th>If...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>The power goes out</td>
<td>You will need a battery-powered radio, flashlight, batteries, cell phone and battery charger, non-perishable food, water. Check your emergency kits to make sure you can function at least a week without power. You will need ways to cook or boil water in the weeks to follow, like an outside grill or camp stove. If you can find an open store you will need cash. You also will want items to keep you occupied: books, board games, etc.</td>
</tr>
<tr>
<td>The power stays out for six hours</td>
<td>If there is food in the refrigerator, move perishable foods into an ice-filled cooler. Put a thermometer in the cooler to make sure it stays below 40°F. Meats and other perishable foods can stay above 40°F without spoiling for two hours.</td>
</tr>
<tr>
<td>The power stays out for two days</td>
<td>If there is food in the freezer, it can be stored safely for two days if you keep the freezer door shut. Once the storm passes, cook any unspoiled food outside and consider sharing with your neighbors.</td>
</tr>
<tr>
<td>The water supply is affected</td>
<td>It is always possible that the drinking water supply could be affected during a disaster. Monitor the news for boil water notices, which means there is a possibility of contamination. In this case you should be prepared to disinfect the water.</td>
</tr>
<tr>
<td>The water supply is affected</td>
<td>Boil—Bring a pot of water to a rolling boil for one minute to ensure bacteria, viruses or parasites are gone.</td>
</tr>
<tr>
<td>The water supply is affected</td>
<td>Bleach—Add 1/8 tsp. of unbleached bleach per gallon of water and let stand for 30 minutes; bleach should contain 5.25 percent sodium hypochlorite. This is less effective than boiling, but will work if there is no way to boil water.</td>
</tr>
<tr>
<td>The water supply is affected</td>
<td>Bleach can also be used as a disinfectant for cleaning by mixing nine parts of water to one part bleach.</td>
</tr>
<tr>
<td>The water supply is affected</td>
<td>If water is out, use your emergency supplies.</td>
</tr>
<tr>
<td>There is a sewer outage</td>
<td>If a sewer outage is announced, DO NOT flush your toilet. Powered sewer lift stations may be down, which could cause a sewage backup in your home. Use a portable toilet, like one used on a boat or camper, or set one up by using one of the following methods:</td>
</tr>
<tr>
<td>There is a sewer outage</td>
<td>8-gallon bucket—Line with heavy-duty trash bag and use household bleach as disinfectant. Make sure it has a tight lid.</td>
</tr>
<tr>
<td>There is a sewer outage</td>
<td>Toilet bowl—Turn off your outside water supply first and flush once to empty before lining with a trash bag. Do not use cat litter. It cannot be flushed after the sewer system is running. Once given the OK by officials, dispose of the emergency toilet’s contents into your household commode. Sanitarily flush your emergency toilet with bleach before storing or disposal.</td>
</tr>
<tr>
<td>Phone, cable &amp; cell service is down</td>
<td>Use a battery- or crank-powered radio—radio broadcasts are usually the last communication source to go down. Get a portable radio and lots of batteries. Tune in to National Weather Service advisories. Severe weather alerts are transmitted through the NOAA Weather Alert Radio. Local radio stations usually report on emergency situations and AM stations can broadcast longer than FM stations.</td>
</tr>
<tr>
<td>Phone, cable &amp; cell service is down</td>
<td>Pinellas County FM HAR 96.3—Use your radio to tune in to the county station for information on local traffic.</td>
</tr>
<tr>
<td>Phone, cable &amp; cell service is down</td>
<td>Mobile Text Messaging—Texting often works when other services do not. If your phone’s digital clock works, then you can send and receive texts.</td>
</tr>
<tr>
<td>Phone, cable &amp; cell service is down</td>
<td>Chargers and batteries—Keep your phone and other devices charged. Make sure you have the connection you need to plug into a vehicle, even if you do not own your own car. Invest in a backup battery charger. There are many models, including solar-powered. Do not forget the basic spare batteries for your radio, flashlight and other emergency items. Make sure your extra batteries have not expired.</td>
</tr>
<tr>
<td>Phone, cable &amp; cell service is down</td>
<td>Apps—Mobile apps were invaluable during Irma. In addition to Pinellas County apps, know which others could be useful, like GasBuddy to find open gas stations or local weather apps. If you have WiFi even if your phone’s data is down, check <a href="http://www.pinellascounty.org">www.pinellascounty.org</a> for information on new county apps.</td>
</tr>
<tr>
<td>Your Home Is Damaged by the Storm</td>
<td>Take refuge in your safe room—an interior room, closet or hallway on the lowest level of your home. The center of your house is the safest. Lie on the floor under a table or other sturdy object if you cannot make it to a safe room. Consider leaving your home ONLY if remaining is more dangerous than the weather outside. Wait until the storm has passed to tend to any damage.</td>
</tr>
</tbody>
</table>

---

# The storm has passed. Now what?

Can I start driving once a storm passes?

Do not attempt to travel after the storm passes until officials say it is safe to do so.

- There will be trees, electrical wires and other dangers on the roads.
- Without power, traffic lights will not be working, making driving very dangerous. Emergency personnel will be busy trying to get to the calls they could not answer during the storm. You put them in more danger by being on the road.
- It is highly likely that your workplace, children’s schools and stores will be closed. Many roads and bridges are likely to be closed or blocked.
- Emergency crews will be dispatched as soon as conditions are safe to begin clearing major roads of debris and open up routes to reach hospitals, fire stations, police stations and other critical facilities.
- Be patient and stay home until it is safe to travel. Once officials say you can drive, you should still be very careful.
- Traffic lights may still be out. Treat all intersections and locations where there is usually a traffic light as an all-way stop.
- Roads may still be littered with debris.
- Many routes may be flooded. NEVER drive through standing water. Remember: Turn around. Don’t drown.

**Will I be able to get back home?**

After an evacuation, many parts of Pinellas County may be inaccessible due to damage, flooding or debris blocking major roadways. Access into the county may be closed. Coming home immediately is not a guarantee.

- Stay tuned to social media and local news for updates on flooded areas, road closures and re-entry points before attempting to return to the county, your home or your business.
- Be prepared with proper ID that identifies you and the address of your residential or business property for re-entry after a storm.
- If you live or own a business on a barrier island, an Emergency Access Permit will make accessing the island after a mandatory evacuation faster and easier. You can get a permit from your City Hall, visit www.pcsoweb.com/emergency-access-permit for more information. If you do not have an Emergency Access Permit, you will be required to wait in line at the law enforcement checkpoint to show identification or other proof of residency, ownership, or employment every time you want to access the island.
Water may be contaminated or electrically charged
Distribution lines—
Flood waters can contain raw sewage, bacteria,
Essential facilities—
return home?

The U.S. Army Corps of Engineers will often come
If your home has major damage it may be declared
Officials will be making initial damage assessments

Contact your insurance agent before
Photograph and list all damaged or lost items
Keep kids and pets with you. There could be
dangerous conditions in the neighborhood, such
as power lines, fallen trees and debris.

Prevent mosquitoes from breeding in standing water
and to protect yourself from bites. Use the
3Ds: Drain water when possible; Dress in light colors and cover all parts of the body; and Defend with DEET, Picaridin or Oil of Lemon Eucalyptus repellant.

Transmission lines (supply voltage to individual households and
be restored first to keep electricity flowing
to public health and safety facilities and to the greatest number of customers as safely and quickly as possible.

1. Public safety situations—locate downed power lines and make sure electricity is no longer flowing through the wires.

2. Transmission, substation equipment and main distribution lines—these serve large numbers of customers and large geographic areas, and must be restored first to keep electricity flowing from power plants to neighborhoods.

3. Essential facilities—emergency service and critical infrastructure such as hospitals, law enforcement, fire departments and water treatment facilities.

4. Distribution lines—we work to get the largest number of customers back on as quickly as possible.

How Duke Energy Restores Power
Restoration Diagram

1. Generation sources (power plants)
2. Transmission lines (supply large number of customers and large geographic areas)
3. Substation (where voltage is lowered)
4. Main distribution lines (deliver electricity to large subdivisions and commercial areas)
5. Power pole (showing underground service to hospital)
6. Local distribution or tap line (the type of line that runs along neighborhood streets)
7. Transformer (reduces service voltage to individual households and businesses—may also be padmounted on the ground)
8. Service lines (to individual homes)
What else should I prepare for?

Preparedness for any hazard, whether natural or manmade, is all about understanding the threats, planning ahead, and being ready to put that plan into action. Many other hazards provide little or no warning or preparation time. If anyone is hurt or if you need immediate help, call 9-1-1.

For more detailed information on these hazards and others visit www.pinellascounty.org/emergency/other_hazards.htm

Some things you should always have:
- A safe room inside your home, workplace, school and other locations where you spend time.
- At least two ways to get emergency notifications. Sign up with Alert Pinellas at www.pinellascounty.org/alertpinellas and know where to get reliable news.
- An emergency plan for home, business, school and other locations you frequent.
- A Go Kit in case of evacuation.
- A Stay Kit in case you have to shelter in place. This should include plastic sheeting and duct tape.
- A safe meeting place in the neighborhood that your whole family knows.
- Emergency contacts (mobile and printed).
- Awareness of your surroundings. Even while doing outdoor activities, take note of locations that might be good for a safe shelter if needed.
- Good communications about emergency plans.
- A two-week supply of food and water at home in case you need to shelter in place.
- Nonprescription drugs such as pain relievers, stomach remedies, cough and cold medicines, fluids with electrolytes and vitamins.

Thunderstorms and lightning

When Thunder Roars Go Indoors

Florida has over a million lightning strikes per year. Pinellas County has regular storms—especially in the summer—that come up fast and can lead to grave danger for those not paying attention. To avoid getting hurt by lightning:
- Check the weather before you go and keep an eye on the sky.
- If you see dark clouds approaching and hear thunder, find a safe place to take cover, like restrooms in a park, a shelter on the beach or even a business near you.
- Get off of any elevated structures.
- Do not lie flat on the ground.
- Do not stand under a tree.
- Get as far away from water as possible.
- Stay away from anything that conducts electricity.

House fire

Get Out, Stay Out, Call for Help

If a fire starts in your home, you may have as little as two minutes to escape.
- Install smoke alarms on every level of your home, inside bedrooms and outside sleeping areas.
- Test smoke alarms every month and change the batteries twice a year.
- Talk to your family about a fire escape plan and practice it. Have two ways to escape.
- Keep items at least 3 feet away from anything that gets hot.
- Do not smoke in the home.
- Turn heaters off when you leave the room.
- Keep matches and lighters out of the reach of children.
- Never leave a burning candle unattended.
- If a fire occurs, get out quickly and call for help. Never go back in for anything or anyone.

Tornados

Duck and Cover

When you get a tornado warning on your emergency weather radio or from Alert Pinellas you will not have much time: about 12 minutes.
- Find your safe room now and make sure everyone in your home knows it. Look for an internal room with no windows as low in the building as possible. Many use a bathroom or a closet. The safe room can also be used when a shelter in place order is given.
- If you are in a car, park safely, get out and seek shelter. Cars are easily overturned. Do not try to outrun a tornado.
- If you are in a mobile home, you must get to a safer place. Identify a safe place now, perhaps the community restrooms, laundry room or community center.
- If you find yourself out in the open, lie down in a ditch or culvert, or if all else fails, lie flat on the ground and cover your head.

Wildfires

In Pinellas County, wildfires can occur in open spaces, parks, preserves and even in your backyard. Drought and freezes raise the chances of fire. Wildfires can be caused by lightning but usually they are started by humans—either by accident or intentionally.
- Maintain the outside of your home and keep it free of anything that will easily burn, such as firewood. Prune vegetation and clean gutters regularly.
- If you see a wildfire, call 9-1-1. Do not assume someone else has reported it.
- If you think you may have to evacuate, get your Go Kit, seal doors, cover vents, close gas valves and turn off pilot lights.
- If ordered to evacuate, do it immediately.
- Do not return home until officials say it is safe.

What to do if you are home or at work

- Get everyone into the safe room (interior room with the least number of windows possible).
- Seal all windows and doors with plastic and duct tape.
- Turn off air conditioning and other ventilation systems.
- Remain indoors until officials say it is safe.
- Stay updated and be sure you are signed up through Alert Pinellas www.pinellascounty.org/alertpinellas

Suspicious behavior

If You See Something, Say Something

While we may not be able to predict an act of terrorism or shooting, we can be alert to suspicious behavior and let officials know when we observe something we think could be a threat. If you see something that you think is suspicious, contact your local law enforcement agency.

Active shooter

If an active shooter is in your vicinity:
1) Run—there is an accessible escape path, attempt to evacuate the area.
2) Hide—if evacuation is not possible, find a place where the active shooter is less likely to find you.
3) Fight—as a last resort, and only when your life is in imminent danger, attempt to disrupt and/or incapacitate the active shooter. For additional resources visit: www.ready.gov/active-shooter

Pandemic disease

It is a small world and infectious diseases can spread quickly by human contact, animals, insects or food. You can help prevent the spread of infectious disease:
- Get routine and travel-related child and adult vaccines.
- Wash your hands frequently with soap and water or alcohol-based sanitizer.
- Avoid close contact with sick people.
- Avoid touching eyes, nose or mouth — that is how germs spread.
- Cover your nose and mouth with a tissue when you cough or sneeze.
- Stay home if you feel ill.
- Use a face mask if advised to.
- For additional information visit: www.cdc.gov or www.pinellashealth.com.

What if we’re told to shelter in place?

Shelter in place means to stay in the building you currently occupy and protect yourself there. Make sure you are receiving your emergency notifications and tune into local broadcasts for official instructions.

There are many reasons you might be told to shelter in place. It could be that there was a chemical spill in the area or that a violent act is suspected. It may only be a matter of hours, not days, that you will be asked to stay sheltered.

If you are notified of an emergency and do not know what to do, play it safe and shelter in place. After a hurricane, shelter in place. Officials will let you know when it is safe.

What NOT to do:
- Leave home, work or the building you currently occupy—for any reason, even to get your kids from school. Schools have emergency plans and will keep your children safe until the danger passes. You may put them and yourself in great danger if you attempt to get them.

What if I am driving?
- Safely park your car as soon as possible and go inside the nearest public building.
- If there are no buildings in the area, park safely (preferably in shade), close your windows, and if instructed to do so, shut off your air conditioning/heat/fan and seal the vents if possible. Use only recirculated air. Listen for emergency notifications on your mobile device and listen to the radio for updates.

What to do:
- Remain indoors until officials say it is safe.

Important Contacts

Want to help?
Volunteering takes planning too.
There are programs that give faith-based communities and other organizations the opportunity to help others in their time of need. By working with Emergency Management, interested groups can receive guidance on preparedness, disaster training and even become a shelter during or after the storm. If you are interested, please contact us at (727) 464-3800.

Adopt A Shelter
During dangerous weather, you may be able to open your facility as a shelter to your employees, congregation or the public. The county will have many sheltering needs after a disaster as well. To talk about how you can help, call Emergency Management at (727) 464-3800.

Billboard Emergency Alert System (BEAS)
Help us let drivers and pedestrians know about urgent news by putting alerts on your electronic signs. By partnering with us, you can help the community prepare and stay safe. If you own or manage a digital sign along any road in Pinellas County and want to be a BEAS partner, visit www.pinellascounty.org/beas, email ema@pinellascounty.org or call Emergency Management at (727) 464-3800.

Pet transport
Residents who will stay in special needs shelters during a disaster need to have their pets taken care of too. You can help bring the dogs and cats to Pinellas County Animal Services so that they can be cared for until their owner returns home. If you can help, call Animal Services at (727) 582-2600.

Ready Pinellas
Get the Ready Pinellas mobile app, the county’s risk assessment tool that helps you look up your evacuation level, create preparedness checklists and plans, and is linked to crucial emergency websites and social media. Ready Pinellas is available to download from the Apple App Store or Google Play.

Sign up for Alert Pinellas, the county’s emergency notification service, and be in the know. This FREE service will call, text and email you with important notices affecting your safety and/or health.
