

Pinellas County Air Quality Division

Notifications & Fee Processing

- All regulated asbestos containing material (RACM) shall be removed from nonexempt structures prior to any demolition activity. Category II asbestos containing materials will become RACM during normal demolition operations. Category I asbestos containing materials may become regulated when the forces of demolition act upon them or when the materials are destined for recycling operations.
- Notifications must be provided using current forms which are maintained on the Pinellas County Internet or by submittal through the State of Florida Department of Environmental Protection electronic notification system. Information submitted through the State system will suffice as the official Pinellas County asbestos notification form submittal requirement.
- Asbestos surveys for demolition may be transmitted as electronic copies through the State system or may be submitted either by hand delivery, mail, fax or email.
- Any asbestos surveys or notification fees which are required must be submitted at the same time the notification information is submitted.
- All notification fee checks must be submitted either by hand delivery, mail delivery or credit card. The 10 working day notification period will not officially begin until all required notification information, fees and asbestos survey documents have been submitted. The Postmark will establish the beginning of the 10 working days.
- Separate notifications and fees are required for renovations and demolitions at the same facility. Notifications cannot be combined.
- If in the course of a demolition or renovation it is determined that the project belongs in a higher fee category than initially determined, an owner/operator shall revise the original notification and pay the balance of the fee for the higher category.
- The Department's fee requirements are not applicable when the NESHAP demolition or asbestos removal project is in a school, college, or university.
