

TRAFFIC TECHNICIAN 2

Job Code	Pay Grade
16510	CL10

Nature of Work

This is skilled supervisory work operating, installing and maintaining traffic control equipment and materials. Employees in this class are responsible for supervising and performing tasks in sign fabrication and installation, striping and pavement markings and manual or automated traffic survey counts. Duties are frequently performed under extremely heavy traffic conditions and during inclement weather. An incumbent may continue to perform Traffic Technician 2 functions for an indefinite time or non-competitively advance to Traffic Technician 3 at the discretion of the appointing authority.

Minimum Qualification Requirements

- Possession and maintenance of Traffic Control Certification by the International Municipal Signal Association (IMSA) Level I preferred (must acquire no later than 1 year from appointment) and 3 years experience in utilities, road, and construction, maintenance or repair work that includes 1 year in traffic signing, markings or signals, or silk screening or commercial sign fabrication; or
- Possession and maintenance of Traffic Control Certification by the IMSA Level I preferred (must acquire no later than 1 year from appointment) and completion of a 2 year vocational or technical school program with a diploma or certification in construction, skilled trades or related field and 1 year in traffic signing, markings or signals, or silk screening or commercial sign fabrication; or
- An equivalent combination of education, training, and/or experience.

Appointing Authority May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, abilities, and credentials relevant to a position.

Illustrative Tasks (These are examples and are not all inclusive.)

- Supervises and participates in the installation of traffic control signs in accordance with rules, regulations, laws and established procedures.
- Applies reflective and non-reflective sheeting and sign faces to sign blanks; operates heat applicator machines in the preparation of signs.
- Supervises and participates in the layout of pavement markings from road construction drawings.
- Supervises and assists in the layout and cutting of pavement marking stencils in accordance with defined standards.
- Supervises and participates in the installation of automated traffic counters, enters data and records; makes field sketches of intersections and streets.
- Supervises the repair and maintenance of assigned equipment; operates power tools.
- Maintains daily work sheets consisting of job numbers, times and materials used; ensures employees follow proper and prudent safety procedures.
- Maintains inventory of supplies and equipment for the Traffic Sign Shop.
- Performs related work as assigned or required.
