

UTILITIES MAINTENANCE WORKER

Job Code	Pay Grade
17148	CL6

Nature of Work

This is semi-skilled manual labor work in the construction, maintenance and repair of utilities collection, transmission and distribution systems. Employees in this class may perform a variety of manual labor tasks as part of a crew and independent judgment may be required in assigned work. Work is performed under varying situations as well as adverse weather conditions and employees may be required to supervise others on a project basis. The incumbent reports to a supervisor or designee.

Minimum Qualifications Requirements

- Completion of the ninth school grade and 1 year of public utility in-ground line, pipe or meter experience; or
- An equivalent combination of education, training, and/or experience.

Appointing Authority May Also Require

- A Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Candidate to obtain a Commercial Driver's License within 1 year of employment or employment may be terminated.
- Candidate to demonstrate more advanced proficiency, competency, and satisfactory completion of regularly assigned work in an independent manner. Appointing Authority retains discretion to employ an incumbent at this level or advance the incumbent non-competitively or competitively after a candidate meets the minimum qualifications to an in-line career ladder position (such as Utilities Specialist 1) within the same organization or department.
- Other highly desirable knowledge, skills, abilities, and credentials relevant to a position.

Illustrative Tasks (These are examples and are not all inclusive.)

- Performs utilities line spotting, locating and referencing.
- Installs, repairs, and maintains utility lines and pipes including laying to proper grade, joining pipe and working in varying depths of excavation.
- Assists in constructing, repairing, and maintaining manholes.
- Assists in setting up well-point systems for de-watering construction and maintenance sites; erects and dismantles wood and sheet steel shoring.
- Assists in performing electrical control system maintenance.
- Sets up and operates pumps, air compressors, generators and related equipment.
- Performs preventative maintenance on water and wastewater treatment facilities.
- Performs routine opening, closing and repairs to system valves and hydrants.
- Restores work sites by laying sod, back filling holes; occasionally performs incidental maintenance and landscaping duties.
- Performs related work as assigned or required.

Knowledge, Skills, and Abilities

- Knowledge of tools, methods and materials utilized in the repair of public utilities collection and transmission systems.
- Ability to recognize safety hazards in work and take precautionary methods to protect self and others.
- Ability to operate, upkeep and perform minor repair work on pumps, air compressors, generators and related machinery.
- Ability to perform heavy manual labor for extended periods and possession of sufficient physical strength and agility to perform such labor, occasionally in adverse weather conditions.
