

Pinellas County Government Mammogram Program October 2021

#inourhands

Pinellas County Government is proud to offer mammogram screenings for female employees, and eligible spouses.

Insurance Coverage

- As a Pinellas County Government employee using an in-network (provider), your screening is **covered at 100 percent** every year starting at age 40.
- If you don't have insurance through PCG, contact your current provider for mammogram coverage, co-pays and deductibles.

Participation Requirements

- If you are 40 or older, you are likely eligible for an annual screening mammogram **without a prescription** from your doctor. If you are younger than 40 years old, you will need a prescription from a physician, requesting a baseline mammogram screening.
- If you have site-specific breast pain or a breast abnormality, you should follow up with your physician, as you may need a different form of testing.
- For women with a history of cancer, you should be cancer free for at least 5 years before participating in a screening mammogram. If you have a history of cancer within the last five years, please follow up with your doctor.
- If you are pregnant or lactating, please consult your doctor.
- All participants will receive follow up either written and/ or a call with all results.
- Referrals offered if needed.

The registration link includes a questionnaire. After completing it, you'll be able to select your appointment date and time. Some of the information you'll need includes the name of your insurance provider, the facility(s) at which your previous mammogram took place, your primary care physician contact information, and medical history information. You must answer these questions in order to complete the registration process. Registration takes approximately 15 minutes. **Do not close the link until your registration is confirmed or your information will be lost.** Google Chrome or Mozilla Firefox browsers are recommended for registration.
