Addendum Report of Pinellas Data Collaborative CJIS System Change Over Time

2007 Findings

Overview

This addendum is to answer additional questions that came out of the dissemination of the Report of the Pinellas Data Collaborative CJIS System Change Over Time. This report includes further analysis on the types of services received while interacting with the other systems (EMS, DHH, IDS, Medicaid, Baker Act), the chronological order of system interactions over time, and examining the influence of receiving services from these different agencies pre and post of arrests. Finally, some de-identified vignettes of the Pinellas Data Collaborative's ability to follow an individual over time and through multiple services systems to better understand needs and access to services.

Overall

Since this study only looked at those who had interactions with 5 other systems as well as the CJIS system, the subpopulation of CJIS used for this study were 42,229 individuals and 147,144 unique arrests over time (1998 – 2006).

There are five systems not including CJIS – Criminal Justice Information System (Jail and Court), Pinellas County:

- EMS – Emergency Medical Services, Pinellas County
- BA – Statewide Baker Act (72 Hr Mandatory Psychological Evaluations) Initiations
- IDS – Statewide Mental Health and Substance Abuse Services (DCF)
- AHCA – Statewide Physical and Mental Health Services, Pharmacy claims paid by Medicaid
- DHH – Department of Health and Human Services, Pinellas County

Overall the sub-population, those who interact with other systems, looks different from the overall population of CJIS. The proportion changes of sub-population of some demographic and non-demographic indicators compared to overall CJIS system. There are proportionately more females, African Americans, are older with the average age of 36 compared to 33 years of age for the overall population, there is especially and increase in those who are in the age group 36 to 45. Non-demographic indicators showed that the sub-population proportionately have more repeat offenders, Greatest Bed and High Bed Users, Parole Violators, felony level crimes, and crimes with drug and alcohol involvement, individuals with a substance abuse and/or mental health diagnosis, as well as the Median # of arrests and # of years in the CJIS system increased from 1 to 2.

	Population Overlap
Emergency Medical Services, Pinellas County (EMS)	12%
Statewide Baker Act (BA)	2%
Statewide Mental Health and Substance Abuse (IDS)	5%
Statewide Medicaid Claims (MED)	5%
Dept. of Health & Human Svcs, Pinellas County (DHH)	10%

Note: Since the last report the Dept. of Health & Human Services data was updated through 2006 and it increased the number of individuals who interacted with DHH from 9% to 10%.

Types of Services

Emergency Medical Services System Interaction (EMS)

Emergency Medical System Interaction

- 12% of the inmate population had interaction with EMS
- Females (16%) are more likely than males (11%) to interact with EMS
- African American (14%) are more likely to interact with EMS
- Ages <= 17 (16%) and ages 36 to 45 (14%), and ages 46 to 64 (17%), and ages 65 to 88 (22%) are more likely to interact with EMS

For one individual there could be from 1 to 120 interactions with EMS during those three year periods, the average being 2 interactions with EMS during the three year period.

21,649 individuals EMS service events (51,600) were found between 2003 and 2006. Of those individuals, 4,210 had interaction (6,207 (12%) service events) with EMS 60 days prior to being arrested or 60 days being released from jail.

Pre 60 days to arrests

5,330 individuals
7,977 arrests

Post 60 days from release

4,289 individuals
6,591 arrests

Of those EMS services that were pre-60 days, 1,277 (16%) happened on the day of arrest. Of those EMS services that were post-60 days, 507 (8%) happened on the day of release. It is important to note that 234 or 46% of the EMS service events that occurred on the day of release had the same arrest date. It is more likely the EMS event will happen 60 prior to arrest then post release.

There are diagnoses in the EMS system. Of the diagnosis found 24.50% were Mental Health, 75% were Physical Health and <1% were not given. Of the Mental Health diagnosis, 52% were substance abuse, and 46% were Mental Health. Of the physical health diagnosis the breakdown is the following:

- Physical Health 34%
- Pain 28%
- Injury/accident 22%
- Seizures 8%
- Unconscious/Unresponsive 3%
- Transient 2%
- Heart 1%
- Other all <1%
 - Abuse Gunshot
 - Amputation Heat
 - Animal Malnutrition
 - Assault Poison
 - Burn Pregnancy
 - Cancer Swelling
 - Disease Unknown

From address was found to be all over the county and not any specific addresses that were apparent. The place most often transported from was St. Anthony's Hospital and that was only 2% of the transports.

Medicaid System Interaction (AHCA)

Medicaid Data System Interaction

- 5.5% of the inmate population had at least one interaction with the Medicaid System
- Females (7%) are more likely than males (5%) to have had interaction with Medicaid
- African American (7%) are more likely to have had interaction with Medicaid
- Ages 36 to 45 (7%), and ages 46 to 64 (11%), and ages 65 to 88 (20%), and ages 89+ (9%) are more likely to have had interaction with Medicaid

Overall

For one individual there could be from 1 to 995 unique dates of service with Medicaid during the periods of 7/1/2002 through 3/2/2007 (6+ years), the median being 64 service dates with Medicaid during the 6+ years period. Only 132 individuals received services that were paid for by Medicaid (17,997 claims) were found. Of those individuals, 59 had services paid for by Medicaid (1,545 claims, 1,545 service dates (45%)) with Medicaid 60 days prior to being arrested or 60 days being released from jail.

Pre 60 days to arrests

49 individuals
830 Medicaid Claims

Post 60 days from release

55 Individuals
926 Medicaid Claims

Of those services that were paid by Medicaid and pre-60 days, 16 (2%) happened on the day of arrest. Of those services that were paid by Medicaid and post-60 days, 22 (2%) happened on the day of release. Two service events showed that the individual was arrested and released on the same day.

Of the Medicaid claims, 63% were service claims, and 37% were pharmacy claims. The top type of service claims were: Medical services, where 94% of the individuals received medical services, then Behavioral Health Inpatient Stay-Deep (36%), Basic Outpatient (27%), and Total Case management (27%). The top pharmacy claims were for Physical health (70%), Mood Stabilizer (39%), Atypical Anti-Psychotic (35%), and anti-anxiety (34%).

For more detailed information on Medicaid claims (services, pharmacy, diagnosis), see Appendix B.

Mental Health and Substance Abuse System (IDS) Interaction

Mental Health / Substance Abuse Data System Interaction

- 5.5% of the inmate population had interaction with IDS
- Females (8%) were more likely than males (5%) to have had interaction with IDS
- Whites (5.57%) are slightly more likely to have had interaction with IDS
- Ages <= 17 (6.5%) and ages 26 to 35 (5.57%), and ages 36 to 45 (7%) are slightly more likely to have had interaction with IDS

Overall

For one individual there could be from 1 to 2,332 unique dates of mental health and/or substance abuse services during the periods of 7/1/1998 through 6/30/2006 (excluding the year 2003), the median being 22 service dates during that period period. The number of individuals who received mental health and/or substance abuse services was 9,496 individuals. Of those individuals, 2,254 (24%) had services within 60 days prior to being arrested and 3,027 (32%) individuals has services within 60 days after being released from jail.

Pre 60 days to arrests

2,254 individuals
18,241 Service event dates

Post 60 days from release

3,027 Individuals
19,563 Service Event dates

Of those individuals 37 (2%) received services on the day of arrest and 71 (2%) received services on the day of release.

Program Type

Program Type	# Ind.	% ind.	# svc	% svc
Adult Mental Health	6,781	71.41%	528,109	56.82%
Adult Substance Abuse	5,840	61.50%	337,764	36.34%
Child Mental Health	577	6.08%	50,436	5.43%
Child Substance Abuse	685	7.21%	13,194	1.42%

For Adult Mental Health the top cost center services were: Medical services (50%), Crisis Support/Emergency (46%), Crisis Stabilization (34%), and outpatient (29%).

For Adult Substance Abuse the top cost center services were: Intervention (29%), Substance Abuse Detox (26%), Outpatient (24%), and Case management (11%).

Child Mental Health, the top cost center services were: Outpatient (2.34%), Medical Svc (2.45%), Crisis Support/Emergency (1.89%), Crisis Stabilization (1.85%), and Case Management (1.54%).

Child Substance Abuse, the type cost center services were: TASC (Tx. Alt. for Safe Cities) (4.38%), Substance Abuse Detox (1.89%), Outpatient (1.12%), Intervention (1.12%).

For more detailed information on IDS see appendix C: programs, services, diagnosis

Department of Social Services System Interaction (DHH)

The sub-population looked at here are those who have been incarcerated in the Pinellas county Jail and who had also received service from the Dept of Health and Human Services, 17,616 individuals interacted with DHH and CJIS. When only identifying Baker Act Initiations that happened 60 days prior to or on arrest date or 60 days post release date there were 5,966 (34%). Of those 5,966 individuals, 3,564 (60%) had interactions within 60 day of arrests, 4,545 (76%) had interactions within 60 of release. Note: recent years of data has been added which identified 1,446 additional individuals;

Within the DHH system there are three types of clients; client (74%), depend (>1%) – a dependent of a client, and oclient (32%) – who is a client that has been identified as homeless. An individual can change the type of client they are defined over time. Of those who were identified at least once as homeless, 67% were also identified as clients who have a residence, although it would require further investigation as to whether the situation of homeless occurred previous to the residence status or prior.

There are 13 different files containing various types of services in the DHH system, containing the following information: General Assistance, Case Management, Referral, Medical Billing, Medical Transactions – Outreach, Other Transactions – Outreach, Petty Cash Transactions, Hospital services – Outreach, Pharmacy. The information below is the total of 9 years of data (1998 through 2006).

Medical Bill History Invoice Procedure Level (BHIST1): Services are provided in Clearwater office, St. Petersburg office, a Medical Van, and a Mobile Medical Unit.

The type of services provided in:

Baker Act System

Baker Act System Interaction

Baker Act System Interaction (BA) (N = 3,330)

Florida's involuntary treatment law is known as the Baker Act (F.S. 394, Part I). The Baker Act Reporting Center receives processes and analyzes statewide Baker Act data. We have received data on short term, involuntary examination since 1997 and on involuntary inpatient placement orders and involuntary outpatient placement orders since 394.451 Short title. This part shall be known as "The Florida Mental Health Act" or "The Baker Act." 394.453 Legislative intent.: It is the intent of the Legislature to authorize and direct the Department of Children and Family Services to evaluate, research, plan, and recommend to the Governor and the Legislature programs designed to reduce the occurrence, severity, duration, and disabling aspects of mental, emotional, and behavioral disorders. It is the intent of the Legislature that treatment programs for such disorders shall include, but not be limited to, comprehensive health, social, educational, and rehabilitative services to persons requiring intensive short-term and continued treatment in order to encourage them to assume responsibility for their treatment and recovery. It is intended that such persons be provided with emergency service and temporary detention for evaluation when required; that they be admitted to treatment facilities on a voluntary basis when extended or continuing care is needed and unavailable in the community; that involuntary placement be provided only when expert evaluation determines that it is necessary; that any involuntary treatment or examination be accomplished in a setting which is clinically appropriate and most likely to facilitate the person's return to the community as soon as possible; and that individual dignity and human rights be guaranteed to all persons who are admitted to mental health facilities or who are being held under s. 394.463. It is the further intent of the Legislature that the least restrictive means of intervention be employed based on the individual needs of each person, within the scope of available services.

The sub-population looked at here are those whose residency is in Pinellas County or those who had a Baker Act Initiation in Pinellas County. A total of 3,330 CJIS inmates over time have received a Baker Act Initiation, the number of Baker Act initiations is 13,749. When only identifying Baker Act Initiations that happened 60 days prior to or on arrest date or 60 days post release date there were 5,445 (40%). Of those 5,445, 2,722 (50%) happened within 60 day of arrests, 2,505 (46%) happened within 60 of release, and 218 (4%) happened either on the date of arrest (44 of the 218, 20%) or date of release (174 of the 218, 80%).

This file contains information including, who initiated the Baker Act, type of harm/concern, and Baker Act Facilities, number of Baker Act initiations done, and number of individuals served.

Of those professionals initiating the Baker Act the breakdown is as follows:

Certtype_CD	1999	2000	2001	2002	2003	2004	2005	2006
1-Judge (ex-parte)	4.04%	6.54%	4.82%	4.08%	4.70%	3.14%	2.18%	2.76%
