Project Overview

To address roadway flooding issues that made it difficult for emergency services to maneuver through the area during storm events, Pinellas County designed and constructed the 22nd Avenue South Drainage Improvement Project. Construction of this project was completed in May 2018.

Project Schedule – Next Steps

- Design Start: November 2015
- Design End: February 2017
- Construction Start: July 2017
- Construction End: June 2018

A ponding issue was identified in the south bound lane on 55th Street South. A ditch bottom inlet and flume have been added to address the issue. Monitoring of the completed project area will continue to see if any additional blemishes arise and correct them as soon as they are identified.

This project is funded through the Penny for Pinellas program.
