

January 2019 Update

Georgia Avenue Drainage Improvements

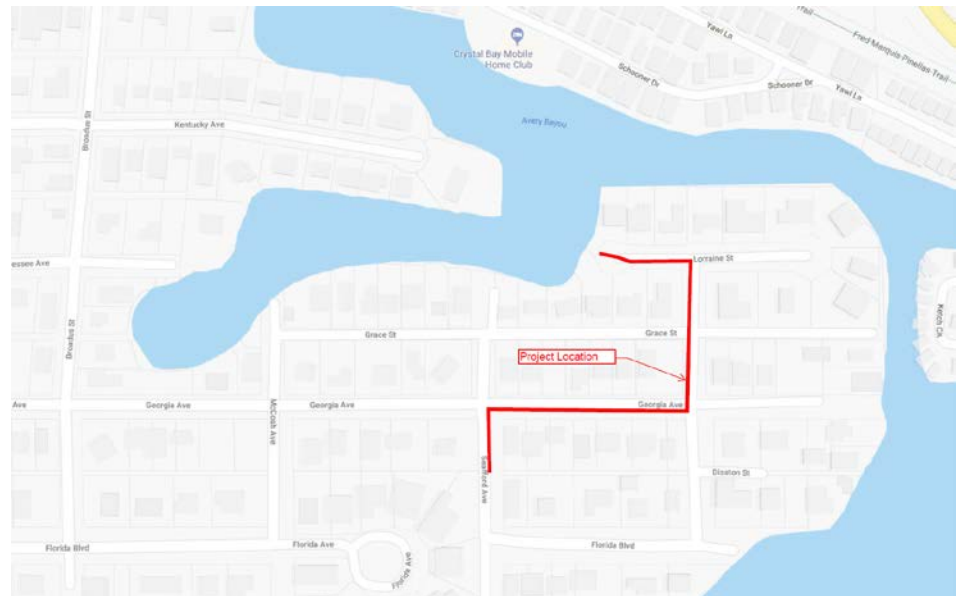

Project Overview

The objective of the project is to improve stormwater management and provide increased flood protection along Georgia Avenue between Seaford Avenue and Disston Street. This community experiences frequent flooding during storm events and has suffered repetitive losses to residential structures. Pinellas County has designed and is constructing the Georgia Avenue Drainage Improvement Project to address these issues. This project also contributes to improving Pinellas County's score with FEMA's Community Rating System, which serves to reduce insurance rates for all Pinellas County homeowners who are required to carry flood insurance. The project area includes Georgia Avenue from Seaford Avenue to Disston Street and Disston Street from Georgia Avenue to Lorraine Street. Portions of Seaford Avenue and Lorraine Street are also included (see map below).

Project Schedule – Next Steps

- Construction Start: June 2018
- Construction End: May 2019

Construction started June 5, 2018. Unexpected utility conflicts encountered on Lorraine Street and Georgia Avenue are anticipated to extend the duration of construction from the original estimated completion date of March 2019 until May 2019.

Project ID# 002116A

Project Location

Georgia Avenue from
Seaford Avenue to Lorraine
Street, Crystal Beach
