Project Overview

Pinellas County has identified water quality concerns in the McKay Creek watershed, which covers approximately 5,500 acres in west-central Pinellas County. The watershed area spans across several jurisdictions, including parts of Largo, Belleair Bluffs, and Seminole as well as unincorporated areas of the county. This project includes the construction of two ponds to improve water quality in McKay Creek. The upstream pond will treat in-stream flows and the downstream pond will treat stormwater runoff from the neighborhood streets.

Project Schedule – Next Steps

- Design End – Completed July 2018
- Construction Start – February 2019
- Construction End – December 2019

August 2018 Update
