

ePayables

Pinellas County offers invoice payment options including payment via ePayables, or ePay. This is a credit card based payment system. To be eligible, your company has to accept credit card payments. Payment via ePay is much faster than other payment methods.

How does it work?

We will issue a unique credit card number to your company. After you submit your invoice, you will receive an email telling you that you have an ePay transaction to take. You process this payment like any other credit card transaction, and you receive your funds right away. The credit card account we give you will have a zero balance. When a payment is authorized, your credit balance will be the amount of your invoice. After you take the payment, the balance goes back to zero.

Is there a cost to participate in the program?

Pinellas County does not charge to participate in the program; however, normal merchant fees charged by your credit card processor may apply.

How do I sign up?

To participate, contact Ruby McKenzie, Pinellas County Purchasing Support Manager at: (727) 464-3795, or email mmckenz@pinellascounty.org. There is a very simple application to fill out.
