Who We Are –

At Pinellas County Solid Waste, our success is a reflection of our more than 75 dedicated employees. Our mission is to ensure that solid waste generated in the county is properly managed and disposed of in an environmentally sound manner while maximizing recovery to conserve natural resources and protect public health. We are committed to public outreach and education to promote our countywide efforts to reduce, reuse, recycle and recover resources.

Pinellas County Solid Waste staff conserves resources by practicing the “4 Rs.”

Reduce: On average, 90 businesses are educated each month by our Business Waste Assessment staff on how to reduce the amount of waste they generate.

Reuse: 250,471 pounds of used household products such as paint, cleaners and automotive fluids were given away free of charge to Pinellas County residents in 2017 through its Swap Shop.

Recycle: 42 reefs have been constructed, on and offshore, from environmentally safe construction and demolition waste to provide valuable underwater habitats for marine life.

Recover: Over 40,000 homes are powered each day with electricity provided by our Waste-to-Energy Facility which uses garbage as fuel.

Accomplishments in Reduction & Recycling

In operation since April 2014, our Industrial Water Treatment Plant efficiently recycles 1.5 million gallons of site surface water per day to provide high-quality water to the Waste-to-Energy Plant, reducing our dependence on drinking and reclaimed water and improving water quality.

Did you know that Pinellas County had the highest recycling rate for the last 2 years?
