

# Don't Trash That!

There are some types of waste that should never be put in the trash can. These wastes may be dangerous, or they may require a special type of disposal. They should be kept out of the landfill.

## Household Electronics and Chemicals

**DANGER**

Contain harmful chemicals that can cause fires or explosions in the garbage truck or pollute the environment if they leak or spill.

**SAFETY**

Should be delivered to the Household Electronics and Chemical Collection Center (HEC3) or one of the Mobile Collection events.

Below is a list of items you should not throw in the trash. Put a "C" in front of items known as household chemicals. Put an "E" in front of items known as household electronics.
