

Volunteer Opportunities

Position:	Computer Programming / Database Conversion
Department:	Air Quality Division
Duties:	Interested in applying your skills and/or learning new skills? We need a talented volunteer interested in the challenge of upgrading our 2003 Microsoft Access database to Access 2013. Currently, our staff spends so much time performing work-arounds in this outdated software that they are spending less time in the field providing service to the community. This position will help and involves updating the merge and edit functions throughout the database forms, removing/replacing any legacy coding, and updating the file search codes to Access 2013.
Location:	509 East Ave S, Suite 138, Clearwater, FL 33756
Map:	gmap 
Schedule:	Eight hours per week minimum; flexible
Skills Needed:	Advanced computer programming skills with various database platforms, specifically Access.mdb and Access.accdb. Volunteer must have the ability to work independently and have advanced problem/trouble-shooting skills. Optional, but desirable, experience with SQL relational databases such as Oracle and ADF data.
Contact:	Tammy Allen, Air Quality Division, (727) 464-3547
