

Convenience Care Clinics

Convenience care clinics are a great way to get immunized and see a clinician quickly for simple care such as strep throat or pink eye. Clinics are found in local CVS and Walgreens pharmacies. For fastest service, consider making an appointment online.

In 2021, there is a new process for completing a biometric screening. The most simple, and recommended, option is to make an appointment through Rally at a Quest Diagnostics lab. Follow the steps in the [Rally Help Guide](#) or view the [Biometric Screening & Health Survey FAQs](#) to see the options.
