CDC Recommended Guidelines if an Employee is Exposed to COVID-19

The following flowchart applies if an employee has come in close contact with a person with COVID-19 starting 2 days prior to that person testing positive or experiencing symptoms.

1. **Does the employee have symptoms of COVID-19?**
   - No
     - **Is the employee vaccinated?**
       - No: Quarantine for 10 days
       - Yes: Come to work, wear a mask for 14 days, get a PCR test 3-5 days after exposure
   - Yes: Stay home for 10 days and follow CDC guidelines

2. **Is the test positive?**
   - No: You are not required but recommended to wear a mask
   - Yes: Isolate for 10 days since the test administration
